

Orchid Genera and Nomenclature

The information below was provided by Aaron Hicks and was extracted from The Handbook on Orchid Nomenclature and Registration.

Abbreviations followed by * are not officially recognized by the RHS. These are genera that have won AOS awards, but have not been used in hybridization and therefore do not have an official RHS abbreviation. These abbreviations were generated by using the first letter of the Genus name, then using the first 5 consonants (if appropriate) to achieve a 6 letter abbreviation.
